

CASE STUDY · NATIONAL YOUTH WRESTLING CAMP

We don't pitch promises. We ship *solutions*.

How **Vision** — the AI inside Vision Genesis — turned a single client call into a rebuilt, working website. In **one afternoon**.

01

BENCHMARKED THE FIELD

Vision analyzed **six national camp programs** — Young Guns, Jeff Jordan, IMG Academy, Camp of Champions, Purler, and the college camps. The verdict: the entire field runs slow, pricing-burying websites. **Wide open**.

02

LISTENED TO THE CALL

Two bottlenecks surfaced: families **couldn't find the right camp** — pricing sat three clicks deep, quietly killing registrations — and the **same questions flood the inbox** every day.

03

BUILT THE FIX — SAME DAY

Vision turned both problems into features: **transparent pricing + a 60-second camp finder**, and **"Ask Coach"** — an AI assistant trained on all **30 real FAQs**. A live prototype *and* a competitive strategy brief, delivered same-day.
