

Your first AI win: stop losing the registrations you've already earned.

A focused 30-day pilot for Gold Medal Training Camps, built around a tool you already pay for.

Prepared for **Ken & Beth Chertow** · Gold Medal Training Camps · June 2026 · **Ryan Dix**, Vision Genesis

— What we heard from both of you

You said it yourself, Ken: *"a lot of people get on my registration, don't finish it — and we don't have the mechanics to follow up."* Beth named the same gap from the ops side. Right now, every parent who starts a sign-up and gets interrupted is simply gone — that's the leak we close first.

— The opportunity hiding in a tool you already pay for

Your registration system, **RegFox**, has a built-in feature called **Winback** that you're not using — it spots a parent who starts and doesn't finish, saves them as a lead, and sends an automatic follow-up. We scoped exactly what it can and can't do, so this is grounded, not guesswork — then we switch it on and write every message so it sounds like **you**, not a robot.

— What the pilot delivers — two things

DELIVERABLE 1

Winback

Automatic, in-your-voice follow-up to every unfinished registration. We turn on RegFox Winback, write the recovery sequence in your voice, and restructure your sign-up form to capture each family's email up front — the change that makes recovery possible — then deploy it live for you.

DELIVERABLE 2

Ask Coach vo.1

Your most-asked questions answered once, in your voice, and loaded into Gmail templates — so you and Beth reply in seconds instead of retyping all day. The first seed of the full Ask Coach in Phase 2.

The real question: how many recovered sign-ups does it take to pay for the pilot?

Two or three?

Everything past that is money that used to walk out the door — at almost no time cost to you or Beth.

YOUR INVESTMENT

Phase 0 · Discovery — competitor benchmark, live site prototype & AI readiness assessment

\$1,500+ **ON US**

Phase 1 · The Pilot — Winback + Ask Coach v0.1 (30 days), 100% creditable

~~\$5,000~~ **\$2,500** **FRIENDS & FAMILY**

Friends-&-family pricing covers our time, not profit — offered for a testimonial and a couple of introductions.

— What we can look at for Phase 2

Not now — your focus is filling these camps. But once the pilot proves out, here's where we'd go after camp season (detail on the next page):

- **A website that sells** — turn your camp-finder + Ask Coach into a real sales funnel.
- **Beth's registration coordination & inventory management** — the housing, meals, and camp-product side, systematized.
- **Email-list reactivation** — put your 200,000-name list back to work.

WHY THIS IS SAFE TO SAY YES TO

- **Nothing sends without your OK** — drafted first.
- **It sounds like you**, or it doesn't ship.
- **No new software** — it lives in RegFox & Gmail.
- **One outcome** — measured in dollars.

We didn't just diagnose it — we prototyped it.

After one call, we rebuilt a working prototype of your site. Phase 2 turns that prototype into the real thing — not a facelift, a **functionality redesign that turns your website into a sales funnel that minimizes friction to conversion.**

A website that sells

- **Guided camp-selection.** The 60-second "find the right camp" finder, so parents stop getting confused three clicks deep — and more of them finish registering.
- **Ask Coach (full).** The assistant trained on your real FAQs, answering parents on your site and in your inbox so the same questions stop eating your day.
- **Audience-building for new locations.** "Coming soon / join the waitlist" pages that let you validate and fill a new camp market *before* you commit a venue — the same playbook product companies use to launch, applied to camps.

Beth's registration coordination & inventory management

The housing, rooming, meal counts, and camp-product inventory that eat her last month — built into a system that does the heavy lifting and keeps check-in flawless.

Email-list reactivation

Clean, re-engage, and segment your 200,000-name list — and fix deliverability — so it drives registrations again instead of sitting idle in spam folders.

Phase 2 is scoped after the pilot proves out — but this is where the real growth lives: **a site that sells while you sleep, an audience you can point at any new location, and a back office that runs without burning out the two of you.**
