

Your first AI win: stop losing the registrations you've already earned.

A focused 30-day pilot for Gold Medal Training Camps — built around something you already pay for and aren't using yet.

Prepared for **Ken & Beth Chertow** · Ken Chertow Gold Medal Training Camps · June 2026 · **Ryan Dix**, Vision Genesis

— What we heard from both of you

You said it yourself, Ken: *"a lot of people get on my registration, don't finish it — and we don't have the mechanics to follow up."* Beth named the same gap from the ops side. Right now, every parent who starts a sign-up and gets interrupted is simply gone. That's the leak we close first.

— The opportunity hiding in a tool you already pay for

Your registration system, **RegFox**, has a built-in feature called **Winback** that you're not using. It automatically notices when a parent starts a registration and doesn't finish, saves them as a lead, and sends a friendly follow-up — for about two cents an email. It's switched off today. We turn it on, and we write every message so it sounds like **you**, not a robot.

— What the 30-day pilot does

- **Turns on automatic follow-up** for every unfinished registration, and fixes the form so we capture the parent's email earlier.
- **Writes a 3-message winback sequence in your voice** — you approve every word before a single one sends.
- **Hands you ready-to-send replies** to the same parent questions you answer over and over (cost, room & board, "is my kid good enough").
- **Measures it in dollars** — recovered registrations, tracked, so you see exactly what it returned.

Recover ~10 lost sign-ups and the pilot pays for itself.

Even a couple of recovered registrations covers it — everything beyond that is money that used to walk out the door, at almost no time cost to Ken or Beth.

YOUR INVESTMENT

This week's work — competitor benchmark, live site prototype & AI readiness assessment **\$1,500+ ON US**

Registration Recovery Sprint — 30-day pilot, 100% creditable ~~\$5,000~~ **\$2,500 FRIENDS & FAMILY**

Friends-&-family pricing covers our time, not profit — offered for a testimonial and a couple of introductions.

— What we deliberately don't touch yet

This pilot won't go near Beth's housing and check-in system during her busiest month, and we won't touch your email list mid-season. The bigger ideas — automating housing & rooming, putting your 200,000-person list back to work, and reviving your 25 years of instructional footage — are **phase two, after camp**. We prove the wedge first.

WHY THIS IS SAFE TO SAY YES TO

- **Nothing sends without Ken's OK** — every message is draft-only.
- **It sounds like you**, or it doesn't ship. Your voice is the gate.
- **No new software to learn** — it lives inside RegFox & Gmail.
- **One outcome, measured** — recovered registrations in dollars.
